Art Unit: 1634

Notice of Allowability

Status of the Claims

This action is in response to papers filed 9 December 2005 in which claim 56 was and

further in response to amendments discussed and agreed upon between the examiner and Mr.

Murphy as detailed below.

The amendments have been thoroughly reviewed and entered. The previous rejections

in the Office Action dated 13 June 2005 are withdrawn in view of the amendments. The

amendments place the pending claims in condition for allowance.

Claims 56-57 and 59-69 are in condition for allowance.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or

additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the

payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with

David Murphy on 23 February 2006.

The application has been amended as follows:

a. Cancel Claim 58.

b. Replace Claim 59 with the following:

59. The apparatus of claim 56, wherein the flow cell substantially surrounds the active

area of the biochip.

c. Replace Claim 61 with the following:

Art Unit: 1634

61. The apparatus of claim 56, wherein the flow cell has a defined volume.

d. In the specification, first paragraph, line 2, after "filed August 27, 1998," insert ---

now issued as U.S. Patent No. 6,245,508 --- .

e. In the Abstract, delete lines 10-27.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The claims are drawn

to an apparatus comprising a circuit board, a biochip adhesively mounted to the circuit board,

a permeation layer on the biochip and a fluidic system comprising a flow cell. The element

distinguishing the apparatus over the prior art is the positioning of the window within the flow

cell so as to be parallel with the plane of the biochip and the flow cell, but offset from the plane

of the flow cell as illustrated in Fig. 6. While Hollis teaches a flow cell apparatus comprising a

biochip and Wilding teaches a windowed flow cell, the prior art does not teach of fairly suggest

a biochip device having the claimed optical window positioning.

Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the

issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

Conclusion

Claims 56-57 and 59-69 are in condition for allowance.

Art Unit: 1634

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BJ Forman whose telephone number is (571) 272-0741. The examiner can normally be reached on 6:00 TO 3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Jones can be reached on (571) 272-0745. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to (571) 272-0547.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.

For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.
